

HIMSS

MISSION OF HIMSS

HIMSS is a global, mission-driven **non-profit organization** that advises healthcare providers, governments, and technology companies on digital health transformation.

Through its internationally recognized digital maturity models and evidence based frameworks

HIMSS will support the hospital group in evaluating its current digital health capabilities, identifying structural and operational gaps, and benchmarking its performance against global best practices

To drive healthcare transformation through information and technology

To advocating for digital health policies and best practices

Efforts to build workforce skills and expertise

KEY FOCUS AREAS

Digital Transformation

Policy and Leadership

Interoperability and Standards

Cybersecurity and Data Privacy

Workforce Development

Events and Conferences

Maturity Models

Advocacy

HIMSS engagement will serve three strategic objectives KLES Hospital:

1. Benchmarking Current Capabilities

Establish a clear, evidence-based baseline of digital health capabilities for the 3 hospitals, enabling informed planning and alignment with international best practices.

2. Identifying Gaps and Priorities for Future Investment

Through a structured evaluation of infrastructure, systems, and governance processes, HIMSS will highlight operational gaps and provide strategic guidance on areas requiring investment or redesign.

3. Recommending a Fit-for-Purpose Digital Governance Model

HIMSS will deliver targeted recommendations on governance and coordination mechanisms that can help KLE drive adoption, ensure accountability, and scale transformation sustainably.
